- **Frameworks** : Bootstrap, React.js
- **Tools :** Figma

INTERNSHIPS

Technical Hub   Jul '22 - Nov '22

Full Stack Development- Intern

During my Internship at Technical Hub, I learned how to create static websites using HTML5 and style them using CSS3, and Bootstrap to make the website mobile-responsive. Additionally, I gained expertise in adding dynamic features to websites using JavaScript and learned how to deploy websites using GitHub. I also learned how to connect websites to a server using Node.js and Express.js, and how to establish a connection to a MongoDB server to store data. Overall, this experience has given me a strong foundation in full-stack web development.

PROJECTS
